

Environmental Management

Creating a Healthy Office

Meridian  inspired office cleaning
responsible

Environmental Management

Why a policy?

We recognise that sustainable development is a fundamental aspect of sound business management and that the pursuit of economic growth and a healthy environment are as one.

Our policies and business activities promote sustainable development, meeting the needs of the present without compromising those of the future.

Typically @ Meridian, we wanted to promote a policy which was based on practical ideas, easily implemented and mutually beneficial, ideas which clients and staff alike would warm to and readily adopt

all at no extra cost to you the client.....

We carefully manage our impact on the environment and we help you to manage yours.

We are committed to using the most environmentally friendly means to provide our cleaning services, at no extra cost.

We have a range of plant based cleaning solutions which not only clean well but are **biodegradable**, **Non Toxic** and **Hypoallgenic**

We offer a range of **biodegradable** black refuse sacks and bin liners also we offer the complete range of recycled paper products.

We favour suppliers who remove excess packaging as part of their supply contract and obligations and who operate according to sound environmental principals.

Our environmental policy doesn't stop at our cleaning and our products, all Meridian leaflets, brochures, letterheads etc are made from 100% recycled paper and where ever possible electronic versions are sent.

All our packaging is recycled and we use re-fillable bottles to further reduce waste.

We are pleased to say Recycling is very much part of today's work place and Meridian pledge to push the use of recycling bins as part of our waste management policy

We work hand in hand with you to promote effective recycling, both at the "point of sale" your staff and in the careful processing of the waste prior to collection.

Environmental demands are tough and we ensure all recycling waste is checked for contamination (non recyclable plastic etc which find their way into the wrong bin) prior to handover

Cleaning materials

Plant based, biodegradable....friendly to the environment and staff.

Meridian use a specially formulated natural plant based range of cleaning products such as its citrus based or mint derived multi purpose cleaners which have all been tested for commercial use.

As well as being biodegradable these plant based cleaning products have a fresh clean natural odour and come with the benefit of having minimal effect on the environment and on the wellbeing of your staff.

In addition all our staff receive specific training in the safe handling and use of all products, this is an ongoing process with regular refreshers and updates.

We see ourselves as your partners in business and when you entrust your building to us, we endeavour to support you in every way.

That's why all COSHH and REACH Data, Product breakdown information, COSHH Assessments, Method statements and H&S Risk Assessments are available on line 24 hours 7 days a week.

Copies are also kept in the site log and come as part of your Health & Safety Induction pack, and integral part of the contract start-up.
